Tom Kirk Lighting creates premium-quality, timeless lighting. We’re passionate about what can be achieved when combining design, craftsmanship and the transformative qualities of light itself.

Our products are eye-catching, refined and versatile. But what really sets us apart is our attention to detail at every stage of the design and manufacturing process. We work closely with designers across high-end residential and commercial projects, providing new solutions and collaborating on bespoke pieces.

We embrace the latest technologies and finishing techniques, whilst celebrating Britain’s rich heritage of quality manufacturing and skilled workmanship. Our product range is designed and hand-assembled at our London workshop, ensuring that each piece is finished to our exacting standards.

Tom graduated from London’s Camberwell School of Art with a First class honours degree in Silversmithing and Metalwork.

Following initial success, in 1997 Tom was awarded a much-coveted Crafts Council grant and established his first London studio in Limehouse, East London. It was here that he began designing and producing one-off and batch produced lights, experimenting with a diverse range of materials and techniques.

The attention to detail, high level of discipline and intricate manual processes demanded by silversmithing directly informed and influenced his meticulous approach to contemporary lighting design.

His work is profiled around the world; from international design shows such as Decorex, Maison et Objet and the ICFF in New York, to publications including Designing the 21st Century and 1000 Lights by Charlotte and Peter Fiell (Taschen).

Today, the collection is designed and produced in Dulwich, South London. Reflecting over two decades of experience exploring materials and processes, Tom’s work continues to attract an increasingly global following.

Facet Chandelier

The original Facet Chandelier. Made from mirror-polished stainless steel or satin aluminium, the exterior facets are acid etched and formed individually to create the body of the light. Inside, two tracks of LEDs provide a unique effect — reflecting infinitely within the facets and casting a warm, ambient light. Please note that the internal finish is always the same as the external finish.

The unique GS Pendant is simple, subtle and elegant. It is the smallest pendant in the GS Series and is available in 3 standard drops. The four different metal finishes give you an added level of adaptability.
The GS Pendant 300 is a larger alternative to the GS Pendant- working well on its own, or as a mini-feature luminaire. Alternatively it is the perfect pendant to complement larger fixtures for a grander arrangement. It is offered in three standardised drops and a variety of finishes to suit your requirements.

The Linear Chandelier, with its distinguished tiered-glass profile is the perfect solution for interiors that require a contemporary and functional source of light. It sits beautifully when suspended over dining tables or as a decorative accent in a wider scheme. The modular format lends itself to customisation. This design is available in seven different lengths with a range of standard finishes.

- Brass based bronze
For interiors that require a more minimal luminaire, the Linear Chandelier Thin is a great lightweight alternative to the Linear Chandelier. It works equally well suspended in open-plan spaces or as a central feature over dining tables and work surfaces. The design is available in two standard lengths and comes with a 3-metre cable assembly that can be adjusted to exactly the right height.

The magnificent five-tier Ring Chandelier combines a mesmerising arrangement of light and pattern. Sized to impress, this product is available in five different diameters ranging from 750mm to 1500mm. Strong, graceful and unique, it is designed to be the focal point of a room – commanding attention and leaving a lasting impression.
Facet Table Light

Much like their ceiling counterparts, the Facet Table Lights are built to complement one-of-a-kind spaces, bringing character to a room. Choose from polished stainless steel or black nickel to add a contemporary finish to your space. The lamps are fitted with an in-line dimmer for additional mood control.

Flute Wall Light Double IP44

The Flute Wall Light Double IP44 is outwardly the same as the standard model, but with an extra level of protection allowing you to use it in bathrooms or wet rooms. Available in polished chrome or gold finishes.
The Flute Wall Light XL is the latest addition to the Flute Wall family. Designed specifically for the US market, this enlarged version has a grander, more substantial feel to the standard Flute Wall Light. Available in polished chrome, nickel or gold, its frosted inner diffuser produces a soft, warm light.
The GS Wall light combines delicacy and precision to unique effect. The three tiers of fine glass straws harness light to produce a beautiful glowing effect. Available in a variety of luxurious finishes to match perfectly with your interior.
